Hot Program in Summer

The following courses are updated to align with the new Common Core State Standards (CCSS). The programs will help students to prepare for the PARCC test, a national assessment for 3rd thru 11th graders.

Reading and Writing Workshop (3rd – 8th): Students will read fables, fiction, non-fiction, poetry and/or biographies to practice their reading comprehension skills and build analytical thinking skills. In addition, students will learn enriching vocabulary so that they will be more effective in expressing their thoughts orally and in writing.

Junior SAT - HS English / PSAT (9th –10th): The focus is on reading comprehension, grammar and essay writing. The students will also learn ten to thirty vocabulary words every day. These words have been taken from recent SAT tests. All in all, this class will prepare students for the SAT as well as enable them to succeed in high school English classes.

Math & Science Preview Workshop: Our program correlates with schools' curriculums. We provide students with Math and Science Preview classes – Elementary Math, Pre Alg, Alg I, Geometry, Alg II, Pre Cal, AP Cal, Biology, Chemistry.
