

Honors Review SAT Programs

Why SAT Class at Honors Review?

- A new digital SAT Materials that has been analyzed and prepared for a long period.
- Excellent SAT teachers
- Students can take the SAT Test with confidence because they receive unparalleled care.

Do you know that many TOP tier universities require SAT or ACT scores for students entering college in 2026? Education experts cautiously predict that students can only get a high score if they prepare sufficiently for the test. The new digital SAT test has a shorter test time compared to the previous SAT test, but the number of questions has been reduced significantly, making it difficult to get a high score. Even if students do well in Module 1 and take the Upper-level test in Module 2, the questions will be more difficult than the previous SAT Test. **Prepare well in the summer of 2025 and take the upcoming New Digital SAT Test**

Power SAT: Reading /Writing/Math

This class is for high school sophomores and juniors. From Monday to Thursday, students will take classes, one in English, and one in math, each lasting 90 minutes. Then from 2:30-4:45 pm on one day, students will complete a full SAT test. On Thursday, students will review each section of

the full test which they will have completed over the course of the week.

Super SAT (11th-12th)

Super SAT is for students going into junior and senior year who are ready to take the August or October SAT. This class focuses on test preparation and intensive review sessions and class —students will no longer be working on the fundamental concepts of the SAT reading, writing, and math sections. Instead, they will be focusing on showing up their weaknesses by reviewing their mistakes and building their test taking stamina. Students will take two full length tests per week and review in classes. To be eligible for this class, students must be able to meet our minimum **score** requirements.

Individual/Small Group Program

You decide which classes to take and how frequently to take them. We cater to your needs and schedule.

❑ Power Writing (3rd–12th)

This one-on-one program aims to improve a student's individual writing skills. Using select essay styles and topics, students will improve their grammar usage, organization skills, and understanding of key essay concepts. This class is an SES program approved by the NJ Department of Education.

❑ Smart Math (ES) Honors Math (MS/HS)

This self-paced course uses customized material to progress students according to ability rather than grade level. After a diagnostic assessment, specific goals will be set to establish effective lesson plans for high scholastic achievement.

❑ Math Team: BCA Math (7th–8th)

Students develop critical thinking and problem-solving skills in competitive math by solving challenging Math Competition problems.

AMC 10: The AMC 10 is the examinations in high school mathematics designed to promote the development and enhancement of problem-solving skills. Many top colleges also request AMC 10 scores as part of the college application process. Our goal is to help students improve math learning skills and test-taking techniques and ultimately develop a concrete understanding.

Grade	Course	Day	Time	
3-5	Elementary English and Math (Small Group)	M/W or T/Th	3:30-5:00	
6-8	6 th Prealgebra	M-Th	9:30-11:00	
	7 th Reading /Writing			
	8 th Junior Critical Reading			
	6 th Reading/Writing		11:00-12:30

	Physics	TBA		

Group Workshop Program

❑ Reading and Writing Workshop (3rd–7th)

This intensive English course utilizes multidimensional analyses to challenge students across a variety of reading genres. Each student receives a textbook, workbook, and vocabulary book. Students take vocabulary quizzes, tackle reading midterms, and compose comprehensive book reports throughout the summer semester.

❑ High School Math and Science Preview Workshops

Our preview classes prepare students for their science and math classes for the coming school year. Our programs correlate with high school curricula to ensure each class is tailored to what students will encounter throughout the school year. Courses include *Biology*, *Chemistry*, *Physics*, *Geometry*, *Algebra II*, and *Pre-Calculus*.

❑ Bergen Academy and High Tech Prep/Junior Critical Reading

This class is designed to prepare 8th grade students for Bergen Academy and Bergen Tech entrance exam. This class focuses on the essential reading/writing skills and math skills required for the highly competitive Bergen Academy and Bergen Tech entrance exam.

❑ Advanced HS English (9th–10th)

Students learn invaluable reading and writing skills to use throughout their entire academic careers. Students will develop critical thinking and writing skills by carefully analyzing select readings from academic journals, news articles, essays, and novels from high school reading lists.
